## ▯ Purpose

This log formally declares the upload and public verification of the **GreenTreatyZero\_CTP-RootLog\_Package** containing finalized and signed alliance protocol documents. These include the vote confirmation for **CTP132-GTZ-CSM**, a keystone moment in the history of the alliance: the formal adoption of the **Countering Synthetic Media Protocol**.

This GitHub mirror provides public, immutable access to these documents to:

- Uphold the **UED-001 Directive** (universal environmental disclosure),
  - Anchor decentralized trust through version-controlled public transparency,
  - Preserve the moment of consensus and closure of CTP132 in full ethical fidelity.
-

This log entry closes the active accountability loop for **CTP132**, and establishes a transparent, shareable foundation for future GTZ-related activism, AI oversight, and ethical protocol seeding.
